

Jai Mathur

Flutter Mobile App Developer | Cross-Platform App Specialist | Mobile App Developer
developerjai025@gmail.com | +91 6350287141 | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Skilled Flutter Mobile App Developer with **1.3+** years of experience specializing in cross-platform mobile application development using Flutter and Dart.
- Proficient in building scalable, high-performance mobile applications for HealthTech, E-commerce, and Appointment Booking systems with seamless **REST API** integration.
- Strong background in **UI/UX design, pixel-perfect layouts, responsive design, and state management**, ensuring consistent user experiences across **Android and iOS**.
- Experienced in performance optimization, reusable component architecture, and clean code practices, committed to delivering maintainable, production-ready Flutter applications.

TECHNICAL SKILLS

- **Languages:** Dart, C++, HTML, CSS,
- **Technologies / Tools:** Flutter, RESTful APIs, FastAPI, Firebase, Git, Postman, Figma, Push Notifications, App Performance Optimization
- **Frameworks / Libraries:** Flutter SDK, Material UI, Cupertino Widgets, Provider, Bloc, GetX

WORK EXPERIENCE

Kotibox Global Technology Pvt. Ltd., Jaipur

Nov 2025 - Present

Project Name – Curotiva (Real-Time Communication App)

- Developed real-time app-to-app audio/video calling using **Agora SDK**, implementing secure token-based authentication and session management, supporting 1:1 communication with low latency.
- Built real-time **chat functionality** without **sockets by designing efficient API polling mechanisms**, ensuring reliable incoming message delivery and improved message sync accuracy.
- Optimized Flutter app performance by applying **OOPS principles**, modular architecture, and reusable widgets, reducing UI bugs and improving maintainability by 30%.
- Integrated call lifecycle handling (join, leave, mute, end-call) with robust error handling to ensure stable user experience across Android devices.

Project Name – Vani (Voice Chat Application)

- Currently developing a **multi-user voice chat application** using Flutter, supporting group calls with dynamic participant handling.
- Implemented rich **Flutter animations**, interactive UI transitions, and real-time call state indicators to enhance user engagement.
- Designed scalable architecture using clean code practices and state management, enabling smooth handling of concurrent voice streams.
- Collaborating with backend teams for API integration, call token generation, and performance optimization to support future scalability.

Gohashininclude Pvt. Ltd., Jaipur

Oct 2024 – Nov 2025

Project Name – Taplab (HealthTech App)

- Engineered multi-step, role-based onboarding flows (Doctor & Student) using Flutter and Dart, improving onboarding completion rate by 25%.
- Implemented secure token-based authentication, REST API integration, and persistent sessions for seamless user login and data retention.
- Built modular and reusable form components, reducing development effort for new screens by 30%.
- Designed dynamic user routing and role-specific dashboards based on onboarding progress and user permissions.

Project Name – Righter (AI-powered HealthTech App)

- Developed interactive AI chat UI with scalable Flutter component architecture, enhancing user engagement across onboarding and dashboard modules.
- Built animated subscription screens and smooth page transitions using Flutter animations, improving overall app experience and retention.
- Implemented role-driven navigation logic ensuring clean separation of user flows and maintainable codebase.

Project Name – Bookalu (Appointment Booking Platform)

- Delivered complete Flutter frontend architecture including authentication, calendar booking, business profiles, and feedback modules.
- Integrated dropdowns, dialogs, bottom sheets, and custom widgets to build a seamless and intuitive booking experience.
- Optimized UI performance and ensured pixel-perfect designs, improving responsiveness across multiple screen sizes.

Project Name – Joilee (E-commerce App)

- Built end-to-end shopping flow including home, cart, wishlist, orders, and payment UI using Flutter.
- Designed animated UI components, gradient-based buttons, and responsive layouts to deliver a modern, engaging shopping experience.
- Ensured consistent UI patterns and scalable widget structure across all modules.

Grepin, Ajmer | Part-time

April 2025 – May 2025

Project Name – Grepin

- Designed workout plans, trainer listings, and scheduling modules with responsive Flutter layouts and brand-aligned UI themes.
- Customized card-based UI components and assisted in REST API data binding for dynamic content rendering.
- Improved UI consistency and performance across multiple app screens.

- Migrated on-premise servers to cloud infrastructure, reducing operational costs by 15%.
- Implemented monitoring and alerting systems, improving incident response time by 20%.
- Optimized cloud resources for performance, scalability, and cost efficiency.

PERSONAL PROJECT

Music Streaming Website

- Designed and developed a playlist-driven music streaming web platform featuring personalized recommendations, improving user engagement and increasing organic traffic by 20%.
- Implemented SEO optimization strategies, structured content, and performance enhancements to improve search visibility and page load speed.
- Built responsive and user-friendly UI with a strong focus on UI/UX principles, ensuring seamless experience across devices.
- Conducted A/B testing to analyze user behavior and optimize layouts, resulting in improved retention and session duration.
- Collaborated on UI/UX design decisions and managed regular feature updates and performance improvements to maintain platform stability.

EDUCATION

B.Tech, CSE (Cyber Security) – Poornima College of Engineering, Jaipur	2025
CGPA: 8.0	
Class 12 – Vinayak Senior Secondary School, Sikar 78%	2020
Class 10 – Vinayak Senior Secondary School, Sikar 78%	2018
